Marat Abdulin
Software Engineer

I'm a skilled software engineer with more than 12 years of experience in web development. During this time I've been working with a variety of technologies and projects. My knowledge covers a broad range of modern full-stack development. I'm proficient in both front-end and back-end technologies.

I'm fond of solving performance issues, working on complex problems and searching for the best solutions that are suitable for both tech and business.
